

2008

Summary of

Award and Scholarship Opportunities

In Oklahoma 4-H

Project Areas

Objectives for completion of project work

The pages that follow list the project areas that will “stand alone” or be judged independently during the current year.

Each stand-alone project has objectives that are meant to guide a 4-H members project work, and to help ensure that the member has a well-rounded project experience. At the top of each page are four general objectives that apply to all project areas. It is expected that as a result of participation in 4-H, that a member would make progress toward those four objectives; in addition to the specific objectives for the project he/she chooses to focus on.

4-H members who work in other projects (those that are not “stand-alone” projects) will compete in one of four All Other Projects areas:

All Other Projects, Agriculture and Natural Resources
All Other Projects, Science and Technology
All Other Projects, Family and Consumer Sciences
All Other Projects, Small Animals

It is up to the member to determine which of these areas best describe his/her project work, and to be sure the county educator knows in which category the project record book is to be entered.

Why do we have objectives for project work?

- Objectives provide standards or guides for project work – they provide direction
- Members who work toward those objectives have the opportunity for similar project experiences
- Judging committees use objectives to evaluate progress a member has made in improving his/her skills in a particular area

Level I Projects and Objectives			
Project Objectives for All Projects	Donor	Award	Objectives
			<ul style="list-style-type: none"> • Apply all 4-H training and experience in choosing and preparing for a career • Practice leadership skills and roles in 4-H and the community • Take part in community affairs and demonstrate citizenship responsibility. • Develop integrity, sportsmanship, decision-making capability and public speaking skills through experiential learning.
