

Downloading Google Earth

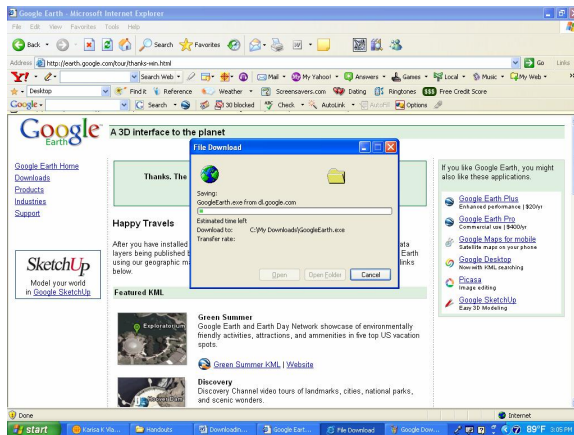

Go to <http://earth.google.com/download-earth.html>

Download the version on the left side for Windows XP

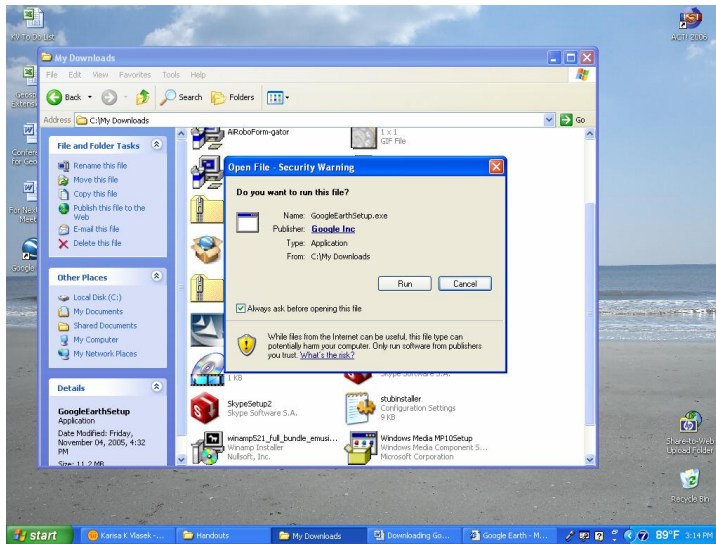

Save the file under "program files" or "my downloads" or somewhere on the on the c drive where you can find it again

Google will take a few minutes to download

When it is finished, go to your c drive and find the place where you saved the downloaded file. Double click on it to install. Click run.

Go with the standard installation and all the defaults. Click finish.
